DETAILED ACTION

Allowable Subject Matter

1. Claims 2-3, 5, 7-8, 10-14, 27 and 30-38 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The closest references the Examiner was able to locate were:

a) **Ostrowsky US 4,478,343**. The reference fails to teach flexible web elements defining a ventilation opening and a predetermined crease line. No motivation could be found to modify the reference to combine such features in a flexible web element.

b) **Hayes US 4,657,153**. The reference fails to teach flexible web elements inversely tapered with respect to retaining elements. No motivation could be found to modify the reference to provide such a structural relationship between the elements. Furthermore, the reference fails to teach a predetermined crease line positioned radially inwardly of the nearest retaining element. Finally, the band is circumferentially discontinuous.

c) **Ma US 2002/0066713**. The reference fails to teach flexible web elements defining a ventilation opening and a predetermined crease line. No motivation could be found to modify the reference to combine such features in a flexible web element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

See attached PTO-892, citing references teaching various container closure caps with tamper evidencing.
